

AFAC Nomination Candidates- CNMS

Bonnie Kegan

What department do you teach for? (i.e. Math, Chemistry, English, Computer Science, Psychology, etc.)

Math

How many years have you taught at UMBC?

22

What strengths would you bring to AFAC?

As a statistician with experience in survey methodology, I am able to identify ways to collect and compile information needed to support AFAC initiatives. I am able to listen and empathize with others even if it is a situation I have not experienced. I am also a good mediator when conflicts arise.

I would like to continue to build a sense of community among UMBC adjuncts from all departments (through outreach and special events). I would also like to continue to address pay issues for adjuncts (COLAS, standardized rates, etc) and to increase the accessibility of or awareness of faculty development or research opportunities for adjuncts. I would also like to continue to advocate for opportunities for adjuncts to have a voice on important departmental or university issues.

What issues would you like to see addressed by AFAC in 2024-2025?

I would like to continue to build a sense of community among UMBC adjuncts from all departments (through outreach and special events). I would also like to continue to address pay issues for adjuncts (COLAS, standardized rates, etc) and to increase the accessibility of or awareness of faculty development or research opportunities for adjuncts. I would also like to continue to advocate for opportunities for adjuncts to have a voice on important departmental or university issues.
