

CNMS Candidates and Statements for Ballot Spring 2026

Number of Candidates: 1

Name: Bonnie Kegan

Years of Service at UMBC: 24

Department: Mathematics & Statistics

What strengths do you think you would bring to the AFAC?

As a statistician with experience in survey methodology, I am able to identify ways to collect and compile information needed to support AFAC initiatives. I am able to listen and empathize with others even if it is a situation I have not experienced. I am also a good mediator when conflicts arise.

What issues do you think the AFAC should be addressing during the 2026-2027 academic year?

I would like to (1) continue to build a sense of community among UMBC adjuncts from all departments (through outreach and special events) (2) continue to address pay issues for adjuncts (COLAS, standardized rates, etc) (3) increase the accessibility of or awareness of faculty development or research opportunities for adjuncts and (4) continue to advocate for opportunities for adjuncts to have a voice on important departmental or university issues.
