

INTRODUCTION TO BIOARCHAEOLOGY

The Malcolm H. Wiener Laboratory for Archaeological Science is launching an intensive week-long course in bioarchaeology to introduce participants to the analysis of human skeletal remains from archaeological settings. Dr. Ioanna Moutafi, a Postdoctoral Fellow at the Wiener Laboratory and expert in bioarchaeology and Aegean prehistory, will lead the course with assistance from Dr. Dimitris Michailidis, an anthropologist/paleontologist and Coordinator of the Wiener Laboratory. The objective of the course is to familiarize participants with the study of human remains and the diverse information they can offer about life and death in the past. A maximum of 10 participants will be accepted for the course. Preference is given to postgraduate or advanced students interested in funerary archaeology and archaeological science and professional archaeologists or museum curators who may occasionally need to work with human remains. This course is not geared toward people with significant experience in human osteology or bioarchaeology. No prior experience in human osteology is required.

DATES: May 30–June 3, 2022

TRAINING FEE: 400 euros
