

SCIENCE & TECHNOLOGY PROGRAM

INSTRUCTORS NEEDED

*Do you have a background in Education, Science, or Robotics?
Do you enjoy engaging and interactive science experiments?
Do you love working with children from Kindergarten to 8th Grade?*

WE NEED YOUR HELP!!!

Club Scientific is currently hiring for After School Instructor and Summer Camp Counselor positions. Science Club instructors are responsible for implementation of our after-school science enrichment programs. ClubScientific's summer camps provide an exciting and safe atmosphere for children, while exploring the world of science. The benchmark of a successful summer camp experience and what a child remembers most about their camp experience is usually the camp's staff members.

Our mission is to create an environment that teaches and nurtures the children under our care. We believe that all children are scientists and that our professional staff can make them better scientists! The bottom line is that our summer camps and school programs are only as good as our personnel. We are extremely selective and we are always looking for the top talent across the country.

DO YOU HAVE WHAT IT TAKES TO JOIN ONE OF THE MOST EXCITING CHILDREN'S SCIENCE COMPANIES IN THE COUNTRY?

To apply, fill out our application online by visiting our website and clicking "Join the Team" then "Apply Online".
