

# WUSTL ENDURE

## NEUROSCIENCE UNDERGRADUATE SUMMER RESEARCH PROGRAM

The Washington University in St. Louis (WUSTL) ENDURE program prepares undergraduates from diverse backgrounds for neuroscience PhD programs. We combine **outstanding research training, a rigorous curriculum and an empowering support system that allows participants to thrive on their path to graduate school and beyond.** With support from the NIH BP-ENDURE initiative and Washington University, **accepted students are funded for up to two summers.** Overall, the program embeds students in a network of neuroscientists and enhances trainee success.

### BENEFITS

- Up to two summers of cutting-edge research.
- \$6500 stipend per summer.
- Free housing and travel to and from the program.
- Academic and professional development workshops
- Attend up to two scientific conferences annually.
- Individualized advising and mentoring.
- Eligibility for academic year research stipend (\$1500/semester)

### ELIGIBILITY

#### A STRONG CANDIDATE IS:

- Interested in research and pursuing a PhD or MD/PhD in a neuroscience-related field.
- Enrolled full-time in a baccalaureate degree program.
- A US citizen or permanent resident.
- From an underrepresented group (e.g. racial or ethnic minorities, students with disabilities, from low income households and first-generation college students).

### PROGRAM DATES

**MAY 30, 2021 -  
AUGUST 6, 2021**

### APPLICATIONS DUE

**FEBRUARY 7, 2021**
