

# Looking in the Mirror

Join us for conversations that will help build and strengthen our community ...

As quoted in former UMBC President Freeman Hrabowski's book, *The Empowered University* (2019),

"as a healthy campus, we must look in the mirror and be honest with ourselves" (p. 234).

The spirit of shared leadership, culture change, and academic success continues to guide this fourth year of the "Looking in the Mirror" series. The organizers seek to provide faculty, staff and students opportunities to engage and voice your opinions about pivotal topics that shape our future as a university and our individual growth.

## Use of Responsible AI in Higher Education
