

CHAN
ZUCKERBERG
INITIATIVE

Join our world-class team working to bring cutting-edge tools and technology to social change.

The Chan Zuckerberg Initiative is dedicated to advancing human potential and promoting equal opportunity. We believe technology can help accelerate discovery and scale solutions to facilitate social change.

Our technology team plays a critical role in advancing all Chan Zuckerberg Initiative focus areas. By pairing engineers with leaders in science, education, and other high-impact fields, we bring technology to the table in a very special way. The Chan Zuckerberg Initiative is uniquely positioned to design, build, and scale software systems to help educators and scientists already working on humanity's greatest challenges.

ABOUT CHAN ZUCKERBERG META

Scientists serve humanity; we serve scientists.

Chan Zuckerberg Meta is dedicated to accelerating discoveries by connecting the world's researchers to all scientific knowledge.

Meta is a real-time discovery tool that helps researchers read, analyze, prioritize, and draw insights across millions of scientific papers. Powered by artificial intelligence, it pinpoints the most relevant studies in a scientific area and finds patterns in the literature on a scale that no human being could accomplish alone. Meta is free for researchers worldwide.

We're hiring data scientists, software engineers, biologists, designers and more.
See <https://chanzuckerberg.com/careers> for all the current positions.

Ask us about other initiatives and projects in science, education, and policy and advocacy:

Human Cell Atlas

A global collaboration to map and characterize all cells in a healthy human body: cell types, numbers, locations, relationships, and molecular components.

Summit Learning Platform

A free online tool that powers teaching and learning. It helps students set and track goals, learn content at their own pace, and complete deeper learning projects.

The Chan Zuckerberg Biohub

An independent nonprofit research center that brings together scientists, engineers, and data scientists to make fundamental discoveries and to develop new technologies for the scientific community.

Policy

Supporting our work in education and science, while also exploring other areas to ensure greater opportunity for all. This includes affordable housing and criminal justice reform.

OUR TEAMS

We believe that high-performing teams include people from different backgrounds and experiences who can challenge each other's assumptions with fresh perspectives. To that end, the Chan Zuckerberg Initiative actively seeks a diverse pool of applicants including women, people with disabilities, people of color, formerly incarcerated people, people who are lesbian, gay, bisexual, transgender, and/or gender nonconforming, first- and second-generation immigrants, and people from low-income families.

ABOUT THE CHAN ZUCKERBERG INITIATIVE

The Chan Zuckerberg Initiative was launched in December 2015 by Mark Zuckerberg, founder and CEO of Facebook, and his wife, Priscilla Chan, a pediatrician and founder and CEO of The Primary School in East Palo Alto. The Chan Zuckerberg Initiative is a new kind of philanthropic organization dedicated to advancing human potential and promoting equal opportunity through world class engineering, grantmaking, impact investing, policy, and advocacy work. Initial areas of focus include supporting science through basic biomedical research and education through personalized learning. CZI is also exploring ways to build stronger, more equitable communities through affordable housing and criminal justice reform. To learn more, visit our Facebook page.
