

APL VIRTUAL COLLEGE VISIT DAYS

YOU'RE INVITED!

Join us in virtually exploring the Johns Hopkins University Applied Physics Laboratory (APL) in Laurel, MD and see what the lab has to offer. Both undergraduate and graduate students from any STEM or STEM related discipline are welcome. Virtually tour our world class facilities and labs, including our explosives detection lab, biology lab, cybersecurity lab, and other innovative spaces. Meet APL leaders, engineers, scientists, computer scientists, mathematicians, and other STEM professionals. This is a great way to learn more about job and internship opportunities.

This event is free and will be held via Zoom. Each day will feature different speakers and tours, so you are encouraged to attend as many events as you can! Event website: <https://secwww.jhuapl.edu/EventLink/Event/26>

Hosted by APL Women in Technology (AWiT)

**Tuesday, January 12 &
Wednesday, January 13**
9AM – 3PM each day

Interested in attending? Register Here:
<https://secwww.jhuapl.edu/EventLink/register/26>

Email AWiT@jhuapl.edu with any questions/concerns

To learn more about APL, visit www.jhuapl.edu

Registration is required and will close on Friday, January 8 at 8PM
