

# MSKVIEW

A diversity recruitment event  
for MSK scientific laboratories

February 4 & 5, 2021

Join us for the fourth MSKVIEW, designed to provide senior-level graduate students and early stage postdocs from underrepresented groups insights about training as a postdoc at Memorial Sloan Kettering (MSK). During this virtual recruitment event, selected participants will:

- learn about the cutting-edge science being conducted at MSK
- meet MSK faculty in one-on-one meetings and roundtables
- hear from current trainees about how they decided to conduct their postdoctoral training at MSK
- receive insights on how to chart their course and navigate career development beyond graduate school and postgraduate training
- present their research and connect with peers

This year we are accepting applications from traditionally underrepresented minority trainees in biology/biomedicine, chemistry, engineering, physics and computational sciences who are:

- PhD and MD/PhD students within 2 years of defending their thesis
- PhD, MD and MD/PhD researchers interested in a second postdoc position

Deadline to apply:

**January 20, 2021**

Apply at:
