

Internships at the Johns Hopkins Health System

Department of Human Resources
Office of Strategic Workforce Development
Johns Hopkins Health System & Johns Hopkins Medicine

Facilities Design & Construction Spring 2022 Internship Information Session

When: Thursday December 2nd, 2021

Time: 3:00pm—4:00pm

Where: via Zoom

Are you a junior or senior majoring in Construction Management, Architecture, Engineering, or Business?

Please join the JHHS Office of Strategic Workforce Development for an interactive information session to learn more about this internship from members of our Facilities Design & Construction team!

As an intern, you will learn about multiple career paths — Planning, Design, Project Management, Capital Purchasing, and Procurement — in the design and construction industry.

You will learn about the types of work involved in a project — planning, design, financing, and execution; what the work environment looks like from the perspective of the hospital (owner), the planner/designer (architect or engineer), and the builder (contractor or construction manager) in an urban hospital setting; and more!

Next Steps

Complete the following interest link to register for this virtual information session:
