CEO of Key Tech

Mary Kay Burch
Vice President,
CINS
Northrop Grumman
Electronic Systems

Next generation manufacturing depends on diverse strategies, new leadership styles and a background in STEM - Science, Technology, Engineering and Math. To remain competitive in the global marketplace, Maryland manufacturers need to know how to transform diversity into opportunity. Learn from these leaders how they are making a difference leading the way to NextGenM.

This event offers a panel/audience discussion and is for anyone who wants to learn about successful women leaders in NextGenM.

NORTHROP GRUMMAN
