PRESENTED BY UMBC'S COMPUTER SCIENCE PROGRAM

From Classroom to Career: **AI IN THE REAL WORLD**

Thursday, October 15, 2026
12:00 PM | Virtual via WebEx

With over one-third of entry-level job postings and 50% of all technology roles now calling for AI skills, hands-on exposure to artificial intelligence has quickly become an essential requirement for college graduates entering the workforce.

But how do foundational computer science concepts translate into real-world AI applications and high-impact career opportunities?

Join us online for an interactive virtual panel hosted by UMBC-Shady Grove's Computer Science undergraduate program. Featuring a panel of student alumni and leading industry partners, this event explores the emergence of AI, its expanding role across the workplace, and how classroom lessons directly power career success.

Secure your spot. RSVP today.
