Honest Data Visualization

September 18, 2024 | 12 noon | Webex

Dr. Kieran Healy
Professor of Sociology
Duke University

Register here

Join us for an engaging discussion about the power of data visualization.

This talk will explore the techniques and best practices for transforming your data into compelling visuals. Drawing insights from his new book, _Data Visualization: A Practical Introduction,_ Dr. Healy will provide guidance to novice and veteran researchers as well as students on how visualization fits into the practice of doing research and communicating results.

Participants will be entered into a raffle to receive a complimentary copy of Dr. Healy's new book!

Don't miss this opportunity to elevate your data presentation skills and make a greater impact on communicating the results of your research.
