

ADVANCING SOCIAL SCIENCE RESEARCH:

A WORKSHOP SERIES ON AI, LLMS, AND COMPUTATIONAL METHODS

FEBRUARY 20 | 12-1:30PM | PUP 438

“Social Network Analysis:
Building Web-Based Applications
for Experiential Learning”

Dr. Steve McDonald
Professor of Sociology
NC State University

APRIL 22 | 12-1:30PM | WEBEX

“Equity in Algorithms”

Dr. Kayla Schwoerer
Assistant Professor of Public
Administration
Vrije Universiteit, Amsterdam

FEBRUARY 27 | 12-1:30PM | PUP 438

“A City in Motion: How Everyday Routines
Channel and Control Crime in Baltimore”

Dr. Brian Soller
Associate Professor of Sociology
UMBC

APRIL 29 | 12-1:30PM | WEBEX

“Evaluating LLMs for Credible and
Rigorous Social Science Research”

Dr. Michael Overton
Associate Professor of Political Science
and Public Administration
University of Idaho

APRIL 10 | 12-1:30PM | PUP 438

“Geospatial Analysis”

Krishna Mummadi
CS3 Graduate Assistant
GES Graduate student, UMBC

MAY 1 | 12-1:30PM | PUP 438

“ML Models for Causal
Inference Analysis + HPC”

Dr. Eric Stokan
Director, CS3
Associate Professor of Political Science
UMBC

**APRIL 14 | 2-4PM | WALKER AVE
SUITE 130 (HYBRID)**

“Foundations of Large Language Models”

Dr. Josephine Namayanja
Executive Director iHARP, UMBC

Roy Prouty
Assistant Director for Research
Computing, DoIT
UMBC Ph.D. Candidate
Computer Science, CSEE

Rhoda Nankabirwa
iHARP Research Assistant
UMBC Ph.D. Student

Sai Vikas Amaraneni
iHARP Research Assistant
UMBC Ph.D. Student

The Center for Social Science Scholarship is pleased to present this workshop series on generative AI, LLMS, and computational social science methods.

Featuring several speakers throughout this academic year, each session will be focused on familiarizing faculty and students with deploying AI and LLM models in their research, with a deeper understanding of the ethical, equity, and environmental consequences of these models.

This series is being supported through the Elkins Professorship.

**ARTIFICIAL
INTELLIGENCE**

Registration is required. Hosted by the Center for Social Science Scholarship, and cosponsored by the Division of Information Technology, the Center for Scalable Data and Computational Science, and CGC-SCiPE.
