

THE AI PARADOX

Virginia Dignum

Professor of Responsible Artificial Intelligence at the Umeå University, Sweden
and Member of the United Nations Advisory Body on AI

In this talk, Virginia Dignum will discuss the often contradictory nature of AI, exploring how its advancements highlight the irreplaceable qualities of human intelligence and the importance of governance.

An exploration of key paradoxes can help us uncover how AI shapes our world and how we can ensure it serves humanity ethically and equitably.

March 5, 2025, 4 p.m., PAHB 216

This event is sponsored by the Breaking the M.O.L.D. initiative funded by the Mellon Foundation.

COLLEGE OF ARTS, HUMANITIES,
AND SOCIAL SCIENCES
