How to Write an Outstanding Book Proposal

This workshop will acquaint prospective authors with the key components of the scholarly book proposal, highlight common mistakes that first-time (and experienced!) authors make, and offer concrete tips on how to make your proposal stand out in the sea of submissions at your dream publisher. Even if you have written successful book proposals before, you will learn new information to take your future projects to the next level.

Faculty who are engaged in humanities-based research are welcome to attend.
