

Investing in the Age of Artificial Intelligence

Manage a \$100,000 simulated portfolio. Learn how markets price AI. Trade against the S&P 500 all semester, sharpen your judgment with the room, and compete for a real \$10,000 award. No tuition, no application, no experience required.

8 SESSIONS • 16 WEEKS • \$100,000 SIMULATED • \$10,000 AWARDS • \$0 COST

WHEN

Every other Monday, 10:00–11:30 AM ET. Aug 31 – Dec 7.

JUMP IN NOW

Next session Mon, Sept 14. Join through late September and catch up on the recordings.

WHERE

Live on Zoom. Trade on the MarketWatch simulation platform from anywhere.

WHY JOIN

Learn to invest the way the market now thinks.

- **Trade real markets, risk nothing.** Build a \$100,000 simulated portfolio on MarketWatch, trade by trade.
- **Read the news like an investor.** Work out each week what the headlines mean for the stocks you hold.
- **Use AI out in the open.** Show the group which tools you used and what they got right. Learn from others.
- **Think like the greats.** See how Buffett, Swensen, Cathie Wood, and Peter Diamandis read a market.

Who wins this? Last fall's three winners were a practicing oncologist, a college professor, and a pre-med student. None came from finance. If you already run something, whether a business, a nonprofit, or a household budget, you are ready.

THE \$10,000 OPPORTUNITY

Beat the S&P 500 by Dec 7 and you could be handed a real \$10,000 portfolio to steer.

Course founder Dan Ye personally selects top performers on returns, quality of reasoning, and smart use of AI. A separate Fixed Income Competition carries its own \$10,000 award.

SIGN UP IN TWO STEPS

1. Send your name and email to **Allison Jones** at ajones9@umbc.edu. Your syllabus and link arrive by email.
2. Scan to open the game and create your portfolio. No password required.

Dan Ye, JD, investor, and serial entrepreneur, created this course and has taught it at Johns Hopkins and UC Merced. Resources and the class AI assistant: professordanye.com · Past sessions: youtube.com/@Dan-Husky · IDEAI-Labs: AI Browne, AIJBrowneJr@gmail.com

Shared with the UMBC community. Course of Brooklyn Tech Ventures LLC, offered through IDEAI-Labs, Living Technologies AI, LLC. Simulated trading involves no real money. Dan Ye arranges post-semester awards directly with selected participants. UMBC carries no financial role in the awards.
