

Clicker Drop-In Workshop

UNDERSTAND AND ASSESS THE
KNOWLEDGE OF EVERY STUDENT AND
DRIVE THEIR STRIVE FOR SUCCESS

Come join us for our final clicker workshop of the fall semester on Wednesday, Nov. 5th from 12noon to 1pm in Engineering 025.

We will discuss the benefits of using clickers, how to merge sessions, sending grades to Blackboard, and how they are revolutionizing the art of teaching and learning. To learn more about this workshop, please visit the DoIT group page at <http://my.umbc.edu/groups/doit>

“ The live classroom is still the best medium for a student to truly be known as an intellectual being and to engage with other such beings ”

As of last year, approximately **5,000** students at UMBC used clickers in classrooms. Clickers are an excellent method of learning how well students are understanding the material and can be easily incorporated into any course curriculum.
