

9/29/2021

- Commuting is a challenge working in the office
- It's good to work in innovative fields such as engineering to stay ahead
- Create a LinkedIn profile to reach out and connect with people in various industries that are open with jobs and new opportunities
- Do something you like to do
 - Develop a plan, build a network, use the resources at your university
- Love what you do and push hard
- Look at unique strengths, values, and experiences you may have
- Your personal network can help you with jobs that aren't posted
 - Many jobs aren't posted
- Building your network includes
 - Broadcasting your interests
 - Getting involved in your community and finding mentors
- Look into services that help build our resumes
- Early job searches and internships lead to good jobs
- You'll have to manage your own career working in technology
- It's a good experience to have a broad area of work to see what the different industries are working with
- Oral and written communication is vital in technology
