VMware by Broadcom: Navigating Change & Guiding Your Journey

Whether you're staying on VMware or charting a migration, CDW can help you navigate the recent announcements from Broadcom. There are many options for evaluating the impact of the changes on your infrastructure and CDW is best positioned to meet you where you're at as your trusted advisor regardless of which pathway you choose.

Join CDW's customer webinar, "**VMware by Broadcom: Navigating Change & Guiding Your Journey**", to hear from our experts on the choices you have with virtualization. Our team will walk you through various pathways that include maximizing your investment with VMware, remaining virtual machine-based, exploring Containers, looking at cloud migration, or creating a custom approach to meet your exact needs. Learn more about the pros & cons to those options and CDW's capabilities to support your organization regardless of the path you take.

Featured Speakers:

Andrew Young, Hybrid Infrastructure Technical Practice Lead – Data Center Solutions

Roger Haney, Digital Velocity Chief Architect – Software Defined Infrastructure

Matt Cobb, Hybrid Infrastructure Technical Practice Lead – Data Center Solutions
