

JOINT PROGRAM IN SURVEY METHODOLOGY

Master's in Survey and Data Science

Our MS program in Survey and Data Science provides rigorous training in:

- Different aspects of data collection, including sample and questionnaire designs
- Statistical tools for effective decision making
- Data visualization, management & analysis of large & complex databases, & machine learning algorithms

In the past, after graduation, our MS students were able to

- Find jobs in social media companies (e.g., Facebook), survey organizations (e.g., Westat), government agencies (e.g., Census Bureau), and international agencies (e.g., World Bank)
- Get admission into doctoral programs in major research universities (e.g., University of Maryland College Park, University of Michigan, Iowa State University, University of Waterloo, etc.)

MS Program highlights:

- 46 credits and summer internship to gain hands-on experience at a private firm or government agency
- 3 tracks: social and psychological science, statistical science, and data science
- Associated faculty from the University of Michigan and Westat
- Designated STEM program
- GRE no longer required for admission

We encourage applications from individuals with an undergraduate degree (or master degree), strong quantitative background, and interest in learning about data science and survey methodology. Please visit our website for more information or scan below.
