

NEURODIVERGENT FACULTY: YOUR VOICE MATTERS

Share your Insights on Generative AI

- We are conducting a multi-phase research study to understand the day-to-day challenges in your professional work and related experiences with Generative AI tools.
- You don't need a medical diagnosis to participate! We use an expansive definition of neurodiversity (ND), which can range from ADHD, Autism, Chronic Illness, Head Injury, Dyslexia, Aphasia, and others.

We want to hear from you! What can you do?

1

Take our survey (~15/20 min):
<https://myumi.ch/bVJNk>

2. Earn \$50 by filling
the form at the end of
the survey

3

(Optional) Express interest for
future phases of the study:
<https://myumi.ch/DWk8R>

Why participate?

- Help make higher education a neuro-friendly place by sharing your challenges and experiences
- Help design inclusive AI tools
- Contribute to a library of strategies and use cases that support ND faculty across disciplines

Note: This study is approved by the University of Michigan Health and Behavioral Sciences IRB (#HUM00274879). No identifying information is collected. All survey responses are delinked by using a separate form for incentives. Contact us at hiraj@umich.edu for any questions.
