IT Steering Committee
Monday, May 22, 2023
10:00 – 11:00 AM
Via Webex

(https://umbc.webex.com/meet/moreira)

Agenda

1) Briefing on meeting with the University Steering Committee (T. Moreira)

2) IT Accessibility Plan (M. Hawken)
It's essential to be able to offer accessibility to all students. Be prepared that a student with a handicap can join your class at any time, just like any other student. Essential to be able to communicate to the campus community what we offer and what resources are available. Plan that a blind student can walk into your classroom at any time. Having an IT accessibility plan makes that possible.
The group continues to make key progress, and a report will be out at the beginning of next year.

3) Policies vote and update (J. Suess / D. Doyle)
The buzzword in cyber security is zero trust. Making a decision that you trust someone based on relationship, geography, reference, etc. We are moving forward with using Multi tool authorization like Duo. Passwords will be less used in the future.

The group Voted in favor of both policies.

4) USM Guide on Privacy Implementation (J. Suess)
The law will go into effect in October 2024.
