FSTEM Saturdays

We need YOU to volunteer!

Volunteer org as tribute (to plan the curriculum for the wonderful students)!

Email us:

umbcsw@gmail.com

esaloka1@umbc.edu

Liz Saloka, Service Chair

Franklin Square
Elementary
Middle School

Partners with:

FSEM Saturday Stem Academy

Our Mission

Through this program we provide the opportunity for the children of FSEM to explore science and engineering on our campus. We hope that their time spent with us will encourage them to pursue a college education and a career in STEM.

The program

One Saturday each month the students visit to participate in an engineering activity, take a tour, and eat lunch on our campus. Our activities have included the robotics lessons and structural design challenges.

We plan to expand our curriculum to include computer programming and chemical sciences!

We need your help

This program is funded primarily by our organization and a generous teacher at FSEM. In order to provide the best experience for the students and improve the sustainability of the program, we are accepting donations. Any materials that could be used for STEM activities would be greatly appreciated. Your donations could also help us open the program to other schools in our area!

The children of FSEM

Testing their towers!

Exelon Interview Process

A typical interview at Exelon will include

- A discussion about the job and roles and responsibilities
- A review of your resume, background, work/military experience, and technical abilities
- A Behavior Based Interview*
- Questions you have for the interview team – if possible think about what questions you might have for the interview team prior to the interview so you are prepared and not trying to think on the spot. This will ensure all your questions are answered.

It is recommended that you prepare for the interview by researching the company. Be prepared to discuss why you would be a good fit for the company and position, and why the job location is a good fit for you.

As a general rule, you should keep your answers concise and to the point, and avoid stray thoughts and rambling. It is ok to think about your answers for a few seconds to gather your thoughts before beginning to speak. If you need more than a couple of seconds, ask the interviewer if you can take a few moments to gather your thoughts; they will be ok with that. However, do not sit in silence for more than 30 seconds.

*Behavior based interviewing is interviewing based on discovering how you acted in specific employment-related situations. The logic is that how you behaved in the past will predict how you will behave in the future i.e. past performance predicts future performance.

In behavior based interviews, you are asked to give **specific examples** of when you demonstrated particular behaviors or skills. You must describe in detail a particular event, project, from your experiences in your past work, military or school, how you dealt with the situation, and what the outcome was. Some examples—not necessarily on this interview—include:

- Describe a time when you were faced with problems or stresses at work that tested your coping skills. What did you do?
- Give an example of a time when you had to be relatively quick in coming to a decision

Your responses should be given in the "STAR," or **S**ituation or **T**ask, **A**ction, and **R**esult format. This format is described below.

Situation or Task	Describe the situation that you were in or the task that you needed to accomplish. You must describe a specific event or situation, not a generalized description of what you have done in the past. Be sure to give enough detail for the interviewer to understand. This situation can be from a previous job, from a volunteer experience, or any relevant event.
Action you took	Describe the action you took and be sure to keep the focus on you. Even if you are discussing a group project or effort, describe what you did -- not the efforts of the team. Don't tell what you might do, tell what you did.
Results you achieved	What happened? How did the event end? What did you accomplish? What did you learn?

Prior to the interview, begin to think about different situations you might have been in at work or school that would be good examples to use in the interview. It is always helpful if you have examples from positions you've held similar to the one for which you are interviewing. Examples that showcase your ability and commitment to safety, integrity, procedural thinking and attention to detail are encouraged.

If you have any questions, do not hesitate to ask. Good luck!

At Exelon, we've got a place for you!

Join the nation's leading competitive energy provider, with one of the largest electricity generation portfolios and retail customer bases in the country.
