A screenshot of the myUMBC website interface. The top navigation bar includes 'Start', 'Topics', 'Events', 'Community', 'Groups', and 'Help'. A search bar is located on the right. The main content area features the 'swe' logo with the tagline 'Aspire / Advance / Achieve' and '1950 2015'. Below this, it says 'UMBC Society of Women Engineers (SWE) Student Organization - 323 people'. A navigation menu at the bottom includes 'Home', 'Posts', 'Events', 'Files', 'People', 'Settings', and 'Promo'. A notification dropdown menu is open, showing 'Notifications: All Updates' and 'Notifications: All Updates' with a checkmark, and 'Important Only'.

## No. 2: Sandia's Jill Hruby

Jill Hruby is the director of Sandia National Laboratories, a federally-funded research center. She got the job in 2015 becoming the first woman to run one of the nation's three nuclear weapons labs.

During the years prior to her promotion she worked on everything from nuclear weapons to solar power.

In 2016, the Society of Women Engineers honored her with its "upward mobility" award, for breaking the glass ceiling in one of the world's most respected engineering organizations and for helping other women in the field as well.

# Heather Rosario

## Vice President

- Major: Chemical Engineering
- Why Run?

I want to help break the stereotype that females can't be engineers. I hope to encourage our younger generation to be excited about going into STEM related fields. SWE is a great support system for those already in a STEM major, and I would like to improve on this even more.

- What I plan to do:

I would like to create workshops that help build our professional as well as learning skills. I will try to plan more social events so our members can get to know other people in their major.

- Past Leadership Role:  
Membership Development Chair
