

# Why choose GE Aviation?

At GE Aviation, we are imagination at work. We are looking for the brightest and best to become our future leaders. We offer students the opportunity to learn and grow in a fast-paced environment, while allowing them to utilize the latest cutting-edge technology and processes in the industry.

## What we have to offer...

GE Aviation's Co-op Program is designed to help you meet your career objectives. Program advantages include:

- **Get Connected** - Connect with our many affinity networking groups that provide mentoring, development and support.
- **Strive for More** - Opportunities for training to enhance your marketability in any role, which may include: functional, technical and computer based training.
- **Get the Edge** - Learn about what is expected to be hired full time into GE's many Leadership programs and direct hire opportunities for when you graduate.
- **Leading the Way** - Meet a variety of senior leaders throughout our business and learn what they have done to be successful.
- **Make a Difference** - Be part of a larger team that gets involved and gives back to the community.
- **Come & See** - Tour some of our high tech areas, see how our product is built and tested and get close to our amazing product.
- **Diversify your Experience** - You will work in a different place each rotation you do at GE Aviation, learn about a new aspect of the business and return to school after having a fresh and amazing industry experience.

## GE Aviation Engineering Co-op Program

GE Aviation's Co-op Program encourages you to explore your professional interests. We are looking for freshmen and sophomore students pursuing a full-time bachelor's degree in Mechanical Engineering that will graduate in 2020 or 2021.

• In **Engineering** you will be part of a diverse rotational experience in design, manufacturing and product support that will give you a strong foundation within aviation that prepares you for a leadership program position when you graduate.

## Ensure you are going someplace when you graduate.

Engineering Co-op/ Intern Leads to:

- Edison Engineering Development Program
- Operations Management Leadership program
- Composites Technical Track
- Direct Hire Position

GE Aviation's Co-op & Internship Program needs students to be able to perform job assignments in the Fall, Spring or Summer. This allows for multiple job assignments during your undergraduate years. Typically Fall and Spring assignments are for a longer period which allows students to earn more money. These students also have a larger selection of assignments in the Fall and Spring. We typically have many more students at GE Aviation in the Summer.

## We expect our co-ops to:

- Be willing to work at any of our 40+ sites in the United States
- Have a minimum 3.0 overall GPA without rounding
- Have your own transportation
- Be a full-time, matriculated student
- Be willing to work multiple rotations during your college years - minimum of 2 rotations required
- Minimum 10 week work terms and follow posted end dates
- Due to access to export controlled information, you must be one of the following: Be a US Citizen or national; US permanent resident; Person granted refugee status; Person granted asylee status or Beneficiary of legalization through an amnesty program.
