

# WE CAN! GO, SLOW, AND WHOA FOODS

Use this chart as a guide to help you and your family make smart food choices. Post it on your refrigerator at home or take it with you to the store when you shop. Refer to the Estimated Calorie Requirements to determine how much of these foods to eat to maintain energy balance.

- **GO Foods**—Eat almost anytime.
- **SLOW Foods**—Eat sometimes, or less often.
- **WHOA Foods**—Eat only once in a while or on special occasions.

# WHOA! AND HOLD UP!

Write down those “whoa!” areas in your life, such as the foods you just love that you know aren’t so good for you, frequent indulgences and cravings (alcohol, caffeine, smoking?), and any hang-ups you have with physical activity. Be honest with yourself. This is for you to really ponder and consider, as we know those “Whoa!” obstacles will sometimes creep up. Next, brainstorm some potential solutions of what you’re going to do about it. Don’t worry—you don’t need to have all of the answers now. But you do need to start thinking about it...
